it is the greatest environmental challenge of the 21st century but what do we truly know about global climate change and what can we do about it most of the world's top scientists agree that emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes fossil fuel combustion and land use changes are causing the earth to get warmer impacts of this warming may include damage to our coastal areas accelerated rates of species loss altered agricultural patterns and increased incidences of infectious diseases the effects of climate change and efforts to mitigate climate change could also have substantial economic ramifications the book presents the latest research and analysis from prominent scientists economists academics and policy makers including tom wigley and joel smith who along with other authors of the science and impacts chapter explain the basic science of climate change the growing evidence that human activities are changing our climate and the impacts of these changes eileen claussen john gummer henry lee and other authors of the global strategies chapter who describe what nations are or are not doing to address climate change and the state of international climate talks robert stavins john weyant ev ehrlich and other economists who explain why economic analyses of climate policy are conducted why the projected costs of addressing climate change vary so widely among economic models and how changes driven by today's economy can influence climate policy gov jean shaheen and other authors of the innovative solutions chapter who describe what state and local governments in the united states and multinational companies are doing to monitor and curb greenhouse gas emissions and forest reinhardt who offers business leaders advice on steering their companies on a path that is healthy for business as well as the global climate this publication has also been published in paperback please click here for details

key features first book of its kind in the field examines and analyzes how key tools are used to conduct theoretical and empirical research in natural resource and environmental economics in contemporary times compiles various articles and accounts concerned with the relevant pedagogical discussion written by recognized experts and prominent international researchers in the field

set against the origins and consequences of the global financial crisis this timely book offers an enriching and revealing narrative of the role that the state plays in regulating markets focusing on core areas of private law

such as corporate labour and banking law the contributors offer a conceptual framework in which to examine the central tenets of the role of private law in today s global economy in the current climate of ever increasing economic inequality and austerity measures the authors highlight the urgent need for a comprehensive analysis of the continuing tension between ideas of market liberalism and theories of society with a focus on both the domestic and transnational dimensions of market governance the authors offer a crucial insight into the co existence and interaction between state and market based economic governance

nutrient recycling habitat for plants and animals flood control and water supply are among the many beneficial services provided by aquatic ecosystems in making decisions about human activities such as draining a wetland for a housing development it is essential to consider both the value of the development and the value of the ecosystem services that could be lost despite a growing recognition of the importance of ecosystem services their value is often overlooked in environmental decision making this report identifies methods for assigning economic value to ecosystem servicesâ even intangible onesâ and calls for greater collaboration between ecologists and economists in such efforts

this student ancillary contains outlines practice problems and essay questions case studies paper topics related reading and websites as well as solutions to quantitative questions in addition this resource contains solid appendices on graphing tools and quantitative techniques and guidelines for writing a research paper amazon ca resources learning tools environmental economics dp 0324360150

international experts have contributed to this volume in honor of professor karl a fox who has advanced the frontiers of economic science in many ways by developing real life applications of econometrics to agricultural economics and economic policy by originating new concepts for understanding complex social systems such as the education sector and functional economic areas and by greatly extending the new discipline of eco behavioral science which deals with discrete units of social activity and its immediate environment called behavior settings

this book presents a series of chapters by several leading economists on how to perform economic analysis in support of litigation matters for many years academic economists consulted in litigation matters but most did not discuss it as it was regarded as not pure economic research as more national economics consulting firms were established specializing in litigation and primarily made up of academic economists the stigma if ever there was one disappeared more than likely young applied economists will not think twice now about working for

a consulting firm or even a consulting firm which specializes in litigation this book examines exactly what forensic economists actually do all the contributors have endeavored to stress the importance of using the economist toolbox properly all with sterling results as young economists contemplate a litigation consulting or any private sector career versus an academic one it is hoped that this book will demonstrate that it is possible to achieve excellence in both fields simultaneously

synthesizes the best current thinking on the problem of electricity regulation

this accessible volume fills a much needed gap and addresses core issues on how economic and environmental systems are interconnected looking at how economic frameworks and features of environmental systems can be integrated within formal models to address changes and associated resource management issues at appropriate levels micro level and national or global level the more the relationship between economic and environmental systems is studied analytically and empirically the more aware we become of the gap in our existing knowledge of environmental data and process parameters while important empirical questions are unanswered in environmental economics literature work on the environmental science of ecological systems fails to raise the right questions and identify key variables in human exploited ecosystems this book covers concepts and methods land water and production biodiversity preservation and production pollution externalities the environment and global economy this timely book will be of interest to environmental scientists economists and policy makers students academics and researchers interested in ecosystems modelling ecological economics and environmental resource economics
