how does gender and minority status shape entrepreneurial decision making this question seems long overdue since minority women in the us start new businesses at four times the rate of non minority men and women this book is about minority women entrepreneurs in the united states though these women are thriving as business owners their stories are very seldom told and few think of minority women as successful entrepreneurs therefore the first purpose of the book is to give voice and visibility to us minority women business owners the second purpose is to explain what makes these women different from the standard white male business owners most people are familiar with through in depth interviews and first hand accounts from minority women entrepreneurs the authors found that in innovative and exciting ways minority women use their outsider status to develop socially conscious business practices that support the communities with which they identify they reject the idea that business values are separate from personal values and instead balance profits with social good and environmental sustainability this pattern is repeated in statistical evidence from around the globe that women contribute a much higher percentage of their earnings to social good than do men but until now there was no clear explanation of why using sociological and psychological theories the

entrepreneurship is challenging whatever your background in the current science and technology driven western world however unlike traditionally dominant native born white male entrepreneurs in silicon valley and elsewhere those who face greater hurdles blocking their path to success primarily come from marginalized and minority groups both real and self perceived including immigrants refugees women blacks hispanics and asians despite their potential to innovate and add value in the global marketplace they persistently struggle or fail because they lack the requisite code breaking skills this book helps these underdog entrepreneurs acquire those skills with actionable advice to achieve and sustain success it proposes a framework that pinpoints what the author calls the outsider problem that is situations in which individuals are primarily disadvantaged because they lack access to networks that facilitate superior learning and performance outcomes he completes the framework by incorporating personal qualities and strategies that can solve this problem along the way morgan distills insights and evidence from multiple fields combined with a fresh look at the familiar stories of initially marginalized business leaders such as indra nooyi jack ma hilary devey and mike lazaridis he also shares the less known but equally inspiring stories of others this book will help readers thrive while transcending their underdog status

minority business enterprises play a significant role in evolving the u s economy and contributing to its gross domestic product although entrepreneurs seek independence and the rewards of entrepreneurship corporate financing may be a necessitate to begin or continue the life of a business however finding engaging and securing capital is an ongoing problem for some that extend beyond existing discriminatory barriers such as race gender ethnic origin or geographical positioning the objective of this phenomenological inquiry is to investigate an additional obstacle encountered when seeking business financing and explore whether the educational level of an applicant is a factor the design utilized a conceptualization adapted from gary becker s economics of discrimination theory to explore whether educational level plays a role in the process the framework investigated the lived experiences of minority entrepreneurs in the st louis metropolitan area in a closed

ended survey in which educational levels are evaluated similarly to other established biases this new research direction is consistent with similar research yet expands it to uncover an additional bias and determinant of corporate financing this study contributes to existing business theories and further develops the knowledge in business by analyzing financial processes relating to mbe s and minority entrepreneurs funding experiences the results indicate an involvement between the educational level of minority entrepreneurs and existing barriers and the level of education as a perceived bias these findings are significant because recognizing discriminatory behaviors and economic barriers can emancipate a minority business owner and rechannel their corporate financing experiences
