unbelievable explodes seven of the most popular and pernicious myths about science and religion michael newton keas a historian of science lays out the facts to show how far the conventional wisdom departs from reality he also shows how these myths have proliferated over the past four centuries and exert so much influence today infiltrating science textbooks and popular culture the seven myths keas shows amount to little more than religion bashing especially christianity

bashing unbelievable reveals why the dark ages never happened why we didn't need christopher columbus to prove the earth was round why copernicus would be shocked to learn that he supposedly demoted humans from the center of the universe what everyone gets wrong about galileo's clash with the church and why it matters today why the vastness of the universe does not deal a blow to religious belief in human significance how the popular account of giordano bruno as a martyr for science ignores the fact that he was executed for theological reasons not scientific ones how a new myth is being positioned to replace religion a futuristic myth that sounds scientific but isn't in debunking these myths keas shows that the real history is much more interesting than the common narrative of religion at war with science this accessible and entertaining book offers an invaluable resource to students scholars teachers homeschoolers and religious believers tired of being portrayed as anti intellectual and anti science

reasonable people agree that other things being equal it is immoral to fail to fulfill deathbed promises to maliciously defame the dead and to mistreat corpses but philosophical controversy swirls over why such acts are morally wrong are these acts wrong only because they violate moral norms against breaking promises lying and abusing others are these acts morally deficient because they wrong the dead are these acts morally wrong because they harm or injure the dead or are these acts blameworthy because they wrong harm or injure those who survive the deaths who are the genuine victims if any of these morally wrong acts when first confronting such questions seriously we discover paradoxes on one hand we are inclined to think that the dead person is in some sense wronged harmed or injured by posthumous treachery after all when a promise is broken when someone is maliciously defamed and when someone's request concerning the disposition of his remains is dismissed we are inclined to think of the victims as the promisee the defamed person and the ignored person respectively on the other

hand in the case of the dead there are no people who might be identified as victims assuming that death marks finality once we are dead we are no more so perhaps the typical moral paradigms dissolve in such cases posthumous harm why the dead are still vulnerable addresses these issues and the host of questions surrounding them
